**GREAT DAY** INC

*making great days in the outdoors*

## Custom Cart & Specialty Vehicle Accessories

*Today's hunters get extremely creative when it comes to their off-road hunting vehicles. Recently, customized golf carts and hybrid golf-type carts have become favorites, if not the preferred hunting vehicles. Especially with the battery-powered models, silent travel in and around hunting areas can be a real plus. However, stealth is not the only great thing about "custom carts"—consider the superior comfort, convenience and smooth ride.*

*Great Day is the leader in the development of accessories that transform regular golf carts into hunting "machines"—accessories for transporting all kinds of hunting gear, guns, bows, etc —even trophy game.*

*In other words, we take customized carts to their full potential.*

*Paul Macke*

# the Power-Ride™

## Gun Carrier      Bow Carrier

### Model CCPR 700

The secret to making a "Custom Cart" a really functional hunting machine is in finding ways to transport hunting gear. The Power-Ride Gun Carrier is the perfect solution—it will attach to either the front or rear frame of the vehicle and hold two rifles, shotguns or muzzleloaders safely and securely as you travel to your favorite hunting location.

Unlike conventional gun racks that only install one way, the Power-Ride Carrier can be positioned to either the inside or outside of the vehicle's frame—giving you many choices of access to your trusty weapons. The Power-Ride features the Slide-Lock mounting system that allows rock-solid installation on the vehicle in just seconds with absolutely no tools needed.

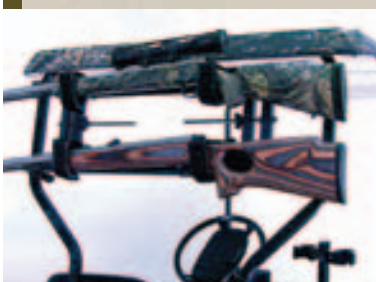

Constructed of tough aircraft aluminum with a hard-as-nails powder-coat paint finish. It works perfectly on all popular brands of custom carts including Club Car, EZGO, Yamaha and Bad Boy.

### Model CCPR 701

One of the greatest challenges in bow hunting is to safely and securely transport a bow from its case to the treestand. It's especially difficult when you travel by an off-road vehicle. The shock from the ride and even the holding device itself can disturb the bow's setting.

Great Day combines the magic of the patented, "Tension-Lock" holding brackets and a unique mounting bracket to create the absolute most secure, most convenient means ever for transporting a bow. The good news—the Power-Ride will install and perform on any custom cart type vehicle on the market—any brand, any style—including EZGO, Club Car, Bad Boy, etc.

The Power-Ride Bow Carrier features all-aircraft aluminum construction, Slide-Lock quick installation and unmatched performance. The holding brackets are strategically positioned and adjustable to accommodate all popular brands and models of bows.

# the **Hi-Rider**™ All-Purpose Carrying Rack

Model CCHR 300

## **Hang 'em high!**

The true test of the worth of a custom cart is how efficiently and conveniently your equipment can be transported. The Hi-Rider is a multi-purpose set of cushioned, super-soft, adjustable and unbelievably versatile holding "cradles" mounted on a single aircraft aluminum structure attached to the front and rear of the cart top frame. Velcro holding straps keep your equipment safe and secure even when traveling rough terrain.

The great thing about the Hi-Rider system is that it can be mounted in many different locations and ways—underneath

the cart top to provide protection from the elements or to the outside for quick and convenient access. The holding cradles can be mounted upright for maximum support or they can be mounted horizontally allowing side loading. With either mounting, the Hi-Rider is perfect for transporting guns, fishing rods, farm tools, etc on any kind of custom cart.

The Hi-Rider installs in just minutes with regular tools and fits EZGO, Club Car, Yamaha, Bad Boy and other brands of custom carts.

## the Bad Boy **Hi-Rider**™ Gun Rack

## **The Bad Boy just got "Badder"!**

The Hi-Rider Gun Rack totally solves the problem of transporting guns in a Bad Boy Cart. The Hi-Rider mounts in the center of the underside of the Bad Boy top and conveniently places two guns in perfect position for maximum protection and quick access. The Hi-Rider attaches to the front and rear cart top frame with regular tools. Guns are held securely in two sets of cushioned cradles, locked in place with Velcro straps and totally protected from the elements and stress of traveling over rough terrain.

The Hi-Rider is constructed of tough aircraft aluminum and finished in a super-hard layer of powder-coat paint. This is one piece of equipment sure to provide years of dependable service.

Model CCBB 301

## the Quad treestand carrier™

Model CCPR 702

### **Here's a Treestand Carrier that goes on easy and gets the job done!**

Designed especially for 4-wheelers and mounts to either factory or after-market racks. The mounting height and placement makes loading quick and convenient.

The Quad Treestand Carrier features independent holding brackets that will accommodate any size or style treestand. Each bracket includes a holding strap to hold the treestand in place even when traveling over rough terrain.

The Treestand Carrier is constructed of aircraft aluminum and finished in powder-coated enamel.

## the CustomCart treestand carrier™

Model CCPR 702

### **Makes any custom cart the complete hunting machine!**

A treestand is an essential piece of equipment for hunting, but can be very awkward to transport on an off-road vehicle. Great Day's Treestand Carrier solves the problem.

The Treestand Carrier mounts to the Car-Go Rack or any after-market cargo basket (fits all 4-wheeler baskets) in the perfect location for quick loading and access. Our unique, independently-moveable holding brackets adjust to handle treestands of any size or shape. Constructed of aircraft aluminum and installs easily without special tools or drilling. Powder-coat enamel finish provides years of good looks and dependable service.

Model BBHNN1001

## the Bad Boy Hitch 'n' Haul

### **You got a load to haul?**

Use all the power of your Bad Boy to get the job done—it's as easy as slipping Great Day's Hitch-N'-Haul into the hitch receiver and you're in business!

The Hitch-N'-Haul is constructed of aircraft aluminum and has the strength to handle loads up to 400 lbs. Carry ice chests, hunting and camping equipment, firewood, tools, sacks of feed or seed—you name it—this is the handiest piece of equipment you could ever add to the Bad Boy! Measures 22"W x 50"L x 6"D and has multiple tie-down points.

# the MINI-TRUCK Rumble Seat™

**There's new off-road travel option for hunters now-a-days—the imported "Mini-Truck".**

The mini-truck is a refreshing alternative to normal off-road travel because it has air-conditioning and heating. It is also extremely effective from a performance aspect—it has 4-wheel drive and can handle off-road, all-terrain tires well.

The biggest drawback with the mini-truck is its limited seating in the cab—it will only accommodate the driver and one passenger. Great Day's Rumble Seat is the perfect means of adding safe and secure seating for two more passengers.

The Rumble Seat attaches to the bed of the mini-truck with quick-detach brackets—allowing instant installation and removal. Just pull four Quick Pins and remove the Rumble Seat to use the full capacity of the bed for hauling cargo—giving you the best of both worlds.

The Rumble Seat is framed with 1-1/2" aircraft aluminum tubing and includes super-soft cushions covered in durable 400 denier nylon fabric. The Rumble Seat even comes complete with safety belts and security straps.

Model UVDRS200BL

# the Custom Cart Car-Go Rack™

Here's an add-on for your custom cart that gives you the perfect means of transporting miscellaneous equipment, gear and supplies. Not only does it have the holding power, it's strong, contoured design says "this is a serious hunting machine".

The Car-Go Rack mounts easily to EZGO, Club Car and other brands and models of battery-powered or gasoline-powered golf carts. Framed in 1" super-tough aircraft aluminum and

measures a whopping 18"W x 37"L x 6"D. Mounts neatly over the area that would normally hold golf bags and is positioned directly over the rear wheels to handle loads up to 250 lbs without affecting stability or performance.

The Car-Go Rack weighs only 12 lbs. and installs with regular tools. Grid design allows multiple tie-down points.

Model CCCR303

# the Bad Boy Power- Loader Mounting System™

Bad Boy owners, now you can enjoy the awesome convenience of having the loading and transporting capabilities of the PowerLoader on your machine. The PowerLoader is the only loading and transporting device available to make the Bad Boy a true hunting vehicle. Getting to and from a hunting location is important, but having a means of handling a trophy animal is a must!

The PowerLoader Mounting System uses strategically positioned braces and supports to provide the "horse-power" to handle loads up to 350 lbs. All components are made of aircraft aluminum and are finished with tough, powder-coat enamel for good looks and durability. When not in use, the PowerLoader folds compactly out of the way and serves as additional rack space. This system is designed to work with Great Day's Model PL 250 PowerLoader.
